

SECTION 8

CONCRETE WORK

1. CONCRETE WORK

- 1.1. Any employee working with concrete is required to wear proper eye, foot, and hand protection.
- 1.2. No employee will be allowed to stand in a pour without protective rubber boots high enough to prevent concrete from getting onto their feet and legs.
- 1.3. Concrete buckets are to be connected by shackles and approved safety hooks.
- 1.4. No employee will be allowed to ride on a concrete bucket.
- 1.5. All wrecked lumber shall have the nails pulled out and not bent over as removed from the forms.
- 1.6. Vertical protruding reinforcing steel shall be covered to prevent impalement and fall hazards if there is an opportunity for an employee to fall on the steel.
- 1.7. All open excavations shall be properly barricaded.
- 1.8. All fall protection regulations shall be followed during forming operations at where fall hazards exist.
